### DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### *Claim Rejections - 35 USC § 101*

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The USPTO "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility" (MPEP 2106.01 and 2106.02), reads as follows:

Descriptive material can be characterized as either "functional descriptive material" or "nonfunctional descriptive material." In this context, "functional descriptive material" consists of data structures and computer programs which impart functionality when employed as a computer component. (The definition of "data structure" is "a physical or logical relationship among data elements, designed to support specific data manipulation functions." The New IEEE Standard Dictionary of Electrical and Electronics Terms 308 (5th ed. 1993).) "Nonfunctional descriptive material" includes but is not limited to music, literary works and a compilation or mere arrangement of data.

When functional descriptive material is recorded on some computer-readable medium it becomes structurally and functionally interrelated to the medium and will be statutory in most cases since use of technology permits the function of the descriptive material to be realized. Compare *In re Lowry*, 32 F.3d 1579, 1583-84, 32 USPQ2d 1031, 1035 (Fed. Cir. 1994) (claim to data structure stored on a computer readable medium that increases computer efficiency held statutory) and *Warmerdam*, 33 F.3d at 1360-61, 31 USPQ2d at 1759 (claim to computer having a specific data structure stored in memory held statutory product-by-process claim) with *Warmerdam*, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory).

In contrast, a claimed computer-readable medium encoded with a computer program is a computer element which defines structural and functional interrelationships between the computer program and the rest of the computer which permit the computer program's functionality to be realized, and is thus statutory. See *Lowry*, 32 F.3d at 1583-84, 32 USPQ2d at 1035.

Claims 16, 18, 19 and 21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter as follows. Claim 16 defines a **medium** embodying functional descriptive material. However, the claim does not define a computer-readable medium or memory and is thus non-statutory for that reason (i.e., "When functional descriptive material is recorded on some computer-readable medium it becomes structurally and functionally interrelated to the medium and will be statutory in most cases since use of technology permits the function of the descriptive material to be realized" - Guidelines MPEP 2106.01 and 2106.02). That is, the scope of the presently claimed **medium** can range from **paper** on which the program is written, to a program simply contemplated and memorized by a person.

***Claim Rejections - 35 USC § 103***

3. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hailey (5546193) of record.

As to claim 27, Hailey shows the claimed invention except the channel setting information which includes information showing whether broadcasting is analog or digital broadcasting with respect to a preset number. The examiner takes Official Notice that the channel setting information including information showing whether the broadcasting is analog or digital broadcasting is well known and widely used in the television art, and therefore it would have been obvious to one of ordinary skill in the art to modify Hailey by having the channel setting information including the information showing whether the broadcasting is analog or

digital broadcasting in order to easily identify and view the channel information.

***Allowable Subject Matter***

4. Claims 1-15 and 22-26 are allowable over prior art.

***Response to Arguments***

5. Applicant's arguments with respect to claims 16, 18, 19, 21 and 27 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
